

The background of the entire page is a repeating pattern of various electronic circuit symbols. These include bipolar junction transistors (BJT) in both NPN and PNP configurations, represented by circles with internal lines and arrows, and diodes represented by triangles pointing towards a vertical line. Some symbols are accompanied by letters like B, C, E, S, D, and G. The symbols are scattered across the white background, creating a technical and thematic texture.

# Design of a class AB Hi-Fi Amplifier
